

# Going From 0 to 100 with Progressive Web Apps & Ember.js

Greg Hurlman  
Software Engineer II, Dynamics 365

# Progressive Web Apps 101

- Discoverable
  - Identifiable as apps, findable by search engines
- Installable
  - Available on home screens, without an app store
- Linkable
  - Easily Sharable with URLs
- Network Independent
  - Works offline and/or on low-quality networks
- Progressive
  - Works for all users, all browsers
- Re-engagable
  - Draws user attention back to the app
- Responsive
  - Fits any form factor
- Safe
  - HTTPS always on

# Our PWA Checklist

- ☐ Registers a Service Worker
- ☐ Responds with a 200 when offline
- ☐ Contains some content when JavaScript is not available
- ☐ Uses HTTPS
- ☐ Redirects HTTP traffic to HTTPS
- ☐ Page load is fast enough on 3G (< 10s to user interactivity)
- ☐ User can be prompted to Install the Web App
- ☐ Configured for a custom splash screen
- ☐ Address bar matches brand colors
- ☐ Has a `<meta name="viewport">` tag with width or initial-scale
- ☐ Content is sized correctly for the viewport

# Why Ember?

- Opinionated
- Testable
- Simple
- Documentation
  - <https://guides.emberjs.com/>
- Community
  - <https://emberjs.com/community/>
- Ecosystem
  - <https://emberobserver.com>

\$ ember new...

# Our PWA Checklist

- ☐ Registers a Service Worker
- ☐ Responds with a 200 when offline
- ☐ Contains some content when JavaScript is not available
- ✓ Uses HTTPS
- ☐ Redirects HTTP traffic to HTTPS
- ✓ Page load is fast enough on 3G (< 10s to user interactivity)
- ☐ User can be prompted to Install the Web App
- ☐ Configured for a custom splash screen
- ☐ Address bar matches brand colors
- ✓ Has a `<meta name="viewport">` tag with width or initial-scale
- ✓ Content is sized correctly for the viewport

# Enter the addons

```
ember install ember-service-worker ember-service-worker-  
asset-cache ember-service-worker-cache-fallback
```

[ember-service-worker](#): Provides baseline support for service workers; provides a pluggable API for you to implement logic for service workers (or use logic others wrote and published as addons)

[ember-service-worker-asset-cache](#): Caches CSS, image and JavaScript assets for the app

[ember-service-worker-cache-fallback](#): Provides offline support for a given path

# Can I use... service worker

IE	Edge <sup>*</sup>	Firefox	Chrome	Safari	Opera	iOS Safari <sup>*</sup>	Opera Mini <sup>*</sup>	Android Browser <sup>*</sup>	Chrome for Android
			49						
			59					4.4	
	14	54	60			10.2		4.4.4	
11	<sup>2</sup> 15	55	61	10.1	47	10.3	all	56	59
	<sup>2</sup> 16	56	62	11	48	11			
		57	63	TP	49				
		58	64						

# Is Service Worker ready?

<https://jakearchibald.github.io/isserviceworkerready/>

`navigator.serviceWorker`

Namespace for page-side service worker API. [Spec](#). [Test](#).

<https://webkit.org/status/#specification-service-workers>

## Service Workers

In Development

A method for browsers to run JavaScript in the background to handle network requests and manage cached responses. Service Workers offers a replacement for Application Cache.

\$ ember install...

# Our PWA Checklist

- ✓ Registers a Service Worker
- ✓ Responds with a 200 when offline
- ☐ Contains some content when JavaScript is not available
- ✓ Uses HTTPS
- ☐ Redirects HTTP traffic to HTTPS
- ✓ Page load is fast enough on 3G (< 10s to user interactivity)
- ☐ User can be prompted to Install the Web App
- ☐ Configured for a custom splash screen
- ☐ Address bar matches brand colors
- ✓ Has a `<meta name="viewport">` tag with width or initial-scale
- ✓ Content is sized correctly for the viewport

# Ember Fastboot

```
ember install ember-cli-fastboot
```

[Ember FastBoot](#) brings server-side rendering to Ember.js applications. It works by creating a Node.js process and executing your Ember application within it.

\$ ember install...

# Our PWA Checklist

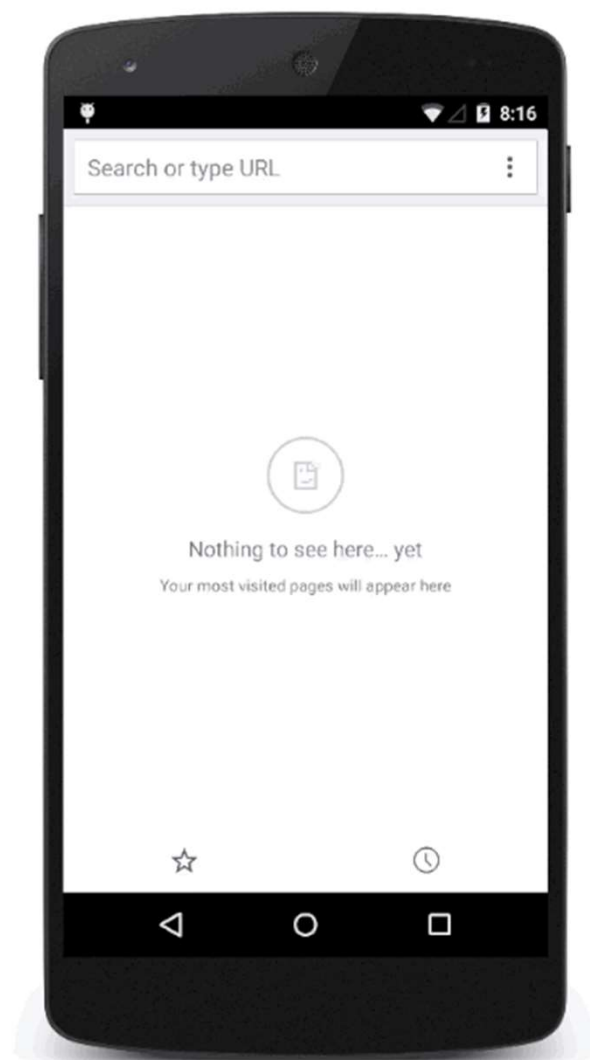

- ✓ Registers a Service Worker
- ✓ Responds with a 200 when offline
- ✓ Contains some content when JavaScript is not available
- ✓ Uses HTTPS
- ☐ Redirects HTTP traffic to HTTPS
- ✓ Page load is fast enough on 3G (< 10s to user interactivity)
- ☐ User can be prompted to Install the Web App
- ☐ Configured for a custom splash screen
- ☐ Address bar matches brand colors
- ✓ Has a `<meta name="viewport">` tag with width or initial-scale
- ✓ Content is sized correctly for the viewport

# Adding a manifest

```
ember install ember-web-app
```

The web app manifest provides information about an application (such as name, author, icon, and description) in a JSON text file.

# Can I use... manifest

IE	Edge <sup>*</sup>	Firefox	Chrome	Safari	Opera	iOS Safari <sup>*</sup>	Opera Mini <sup>*</sup>	Android Browser <sup>*</sup>	Chrome for Android
			49						
			59					4.4	
	14	54	60			10.2		4.4.4	
11	15	55	61	10.1	47	10.3	all	56	59
	16	56	62	11	48	11			
		57	63	TP	49				
		58	64						

\$ ember install...

# Our PWA Checklist

- ✓ Registers a Service Worker
- ✓ Responds with a 200 when offline
- ✓ Contains some content when JavaScript is not available
- ✓ Uses HTTPS
- ❑ Redirects HTTP traffic to HTTPS
- ✓ Page load is fast enough on 3G (< 10s to user interactivity)
- ✓ User can be prompted to Install the Web App
- ✓ Configured for a custom splash screen
- ✓ Address bar matches brand colors
- ✓ Has a `<meta name="viewport">` tag with width or initial-scale
- ✓ Content is sized correctly for the viewport

# Setting up the server & redirect

```
npm install --save fastboot-app-server
```

The FastBoot App Server is an application server for hosting Ember FastBoot apps. It manages downloading the Ember app, starting multiple HTTP server processes, and detecting when new versions of the application have been deployed.

# Deployment: Heroku

```
heroku create
```

```
heroku buildpacks:set
```

```
https://codon-buildpacks.s3.amazonaws.com/buildpacks/heroku/emberjs.tgz
```

```
git push heroku master
```

```
heroku open
```

Uses [heroku-cli](#), Heroku's command-line tool, and also [ember-cli-deploy](#), a pluggable deployment pipeline

```
$ npm install && heroku...
```

# Our PWA Checklist
